INNERGIZE

INNERGIZE HP 8580

Feel Healthy

Everyone has their own plans and dreams for life, but there is one thing we all share: the desire for individual relaxation and tranquillity, so we can remain attractive, fit and healthy. The luxurious Hapro Innergize, with its unique design and numerous functions, is the ideal full body wellness solarium for home use.

In the Innergize's new light, vitality means lovely intense muscle and joint warming, better circulation and pure relaxation, all through its infrared lighting. While at the same time, ultraviolet lighting gives you a fresh tan, ensuring that you look good and fit – a perfect soothing effect. This combination makes the Hapro Innergize unique. Aromatherapy fragrances give the final touch to your wellness experience.

The Innergize is remarkably compact and user-friendly. When folded, it is no bigger than a sports bag. It takes less than 10 seconds to unfold it ready for use, and it's just as easy to put it away again. On top of that, the Innergize's wheels make it easy to store and move around.

The Hapro Innergize is the cutting edge of wellness-comfort. Besides combined infrared and ultraviolet lighting, it lets you use infrared alone whenever you want. Nothing can be more flexible and energy efficient. Whether you want to relax and gently tan your whole body or just a certain part, Hapro Innergize can do it. The digital display makes it easy to use the menu, and thanks to the snooze function, you can enjoy that relaxing feeling just that little bit longer. It's even possible to repeat the entire session by simply pressing one button.
